

## Press Release

# Finally a Beginner-Friendly Way to Learn Git

## fournova launches learning platform for version control with Git

Berlin, Germany - April 15, 2014. Today [fournova](#), the company behind the popular Git client [Tower](#), launches [Learn Version Control with Git](#), a new learning platform for the version control system Git.

The platform offers a wide choice of learning material, including a free online book, various ebook formats, video tutorials as well as live online training.

Unlike other learning content in this area “Learn Version Control with Git” does not require a deep technical background. It aims at beginners of programming, web designers and project managers.

Version control is an essential tool in today’s web and software world and a fundamental part of the workflow in teams large and small.

However, despite its growing popularity, many designers and developers do not use Git yet. With its new learning platform,ournova wants to encourage them to make the switch.

“Our mission is to help people around the world to learn Git and use it productively.” saysournova CEO and author of the book, Tobias Günther.

With its own Git client [Tower](#), the company helps over 35,000 customers from startups to Fortune 100 companies to get the most out of Git. With this new learning platformournova wants to enable even more people to learn version control with Git - no matter if they’re on a Mac or a PC, or if they’re using the Command Line Interface or a GUI.

Aboutournova:

ournova is a startup based in Germany with offices in Berlin and Stuttgart. Its popular desktop app Tower helps over 35,000 customers to easily and productively work with the Git version control system.
