

Press Release

New Git client for Windows users

Fournova announces Tower for Windows, a native Windows version of its popular Mac Git client.

BERLIN, Germany - July 14th, 2016. German software company [fournova](#) announces a Windows version of [Tower](#), its popular Mac Git client. Tower for Mac has become one of the most popular tools amongst Git users. The Windows version is a native application and completely developed from scratch. It brings the proven design and feature set of the Mac version to the Windows platform.

Tower works with all Git hosting services and offers an advanced integration with a selection of services.

Interested users can sign up for the free beta now: <https://www.git-tower.com/p/windows-beta>

The Mac-Version of Tower is already available since 2011 and used by over 70,000 customers worldwide.
